inches

Foot-measuring sheet, page 1 of 2

Heel to 27 cm. bigfeet.net/size-converter

How to measure

1. Print both pages at 100% (Actual size). A bank card must fit the box on page 2 exactly.

2. Cut both pages along the dashed lines.

3. Feet over 27 cm: cut page 2, lay its cut edge on the 26 cm line of this page, line up the rulers and tape it.

4. Put the cut edge of this page against a wall. Stand on the sheet in the socks you will wear, heel against the wall.

5. Mark the tip of your longest toe and read the ruler level with the mark. Do both feet and use the longer one.

6. Find your size on page 2, or at bigfeet.net/size-converter.

Cut along this line. This edge is 0 cm: put it against a wall.

26 to 36 cm, for longer feet. bigfeet.net/size-converter

Check the print size

A bank card should fit this box exactly.

If it does not, print again at 100% (Actual size).
